

■ Communication at Sea

The TT-3064A Capsat® Maritime Telephone has the world's smallest automatic 2-way maritime satellite tracking antenna.

It is the ultimate choice for your vessel, whether it is a private yacht, a large coaster, or a fishing vessel.

The TT-3064A is operated like a standard cellular phone, however, with trans-ocean coverage.

The TT-3064A is a 3-in-1 communication tool providing telephone calls, fax transmission, and e-mail/Internet messaging.
